FINE FORMS OF FLAVOR

ESTD
1984

Quality and trust since 1984

Established in Bursa in 1984 on a 30,000 m² area, Frigo-Pak operates in the production of canned an frozen foods. Since its establishment, the company has achieved sustainable growth through its commitment to producers and consumers, its innovative approach, and its close monitoring of industry developments. Today, Frigo-Pak exports to more than 30 countries across five continents, including Europe, the United Kingdom, Australia, Japan and United States.

Production strength & sustainability

With its advanced production infrastructure and modern facilities, Frigo-Pak continues to strengthen its production capacity while maintaining high quality standards. Adopting a people-oriented approach, the company values employee satisfaction, with women representing nearly 80% of its workforce of more than 1,000 employees. By implementing local and international standards, Frigo-Pak supports sustainable employment, women's empowerment and the development of a qualified workforce.

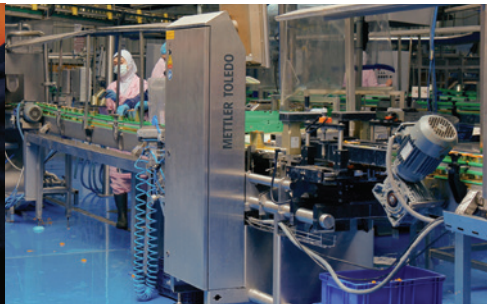

Production in harmony with nature

Spanning a total of 1,717 decares, the plantations form the foundation of Frigo-Pak's environmentally responsible agricultural model. In the cultivation of yellow peaches, artichokes and plums, priority is given to preserving soil fertility, ensuring efficient water management and supporting biodiversity. Through sustainable agricultural practices, Frigo-Pak ensures responsible and reliable production for both present and future generations.

High capacity production capability without compromising on quality

Frigopak has an annual fruit/vegetable processing capacity of 50,000 tons.

Fully mechanized automatic mandarin peeling and segmenting line, processing. 450 tons of raw material per day.

DRIED TOMATOES

Production includes semi-dried tomato segments and sun-dried tomatoes. Offered in halves, strips and diced cuts, the products can be packed in oil or with selected herbs in oil to meet diverse customer requirements.

Tomatoes are oven-dried until they lose approximately 30% of their moisture content, then rapidly cooled and individually quick frozen (IQF).

IQF SEMI DRIED
SEGMENT TOMATOES
